

Bee Natural Uganda Ltd started business in April 2008 after an investment buyout of the previous company Bee Natural products Ltd. Our main area of operation is the west Nile region which includes the districts of Arua, Nebbi, Yumbe, Moyo, Koboko and Adjumani. The Ediofe Mission Centre in Arua is the location of our modern processing plant. Our control of quality is achieved by working with the registered 1,200 beekeepers who are clustered into groups of 15. In collaboration with these groups, we have developed a queen breeding and colony multiplication yard which not only maintains but increases the bee colonies for our beekeepers.

Corporate Social Responsibility work:

Our factory employees are mainly women (70%) who come from a low educational background. The employment opportunity we offer has significantly improved the quality of their lives and those of their families. To encourage a collective community enterprise the beekeeper groups are of mixed gender and provide realisable prospects for a sustainable income stream for the rural poor. We continuously carry out training for the beekeepers and introduce them to modern hives and improved harvesting techniques which not only improve quality but also increase yields and as a result their income. We also introduce them to subsidised financing to grow their business.

Our Products:

Honey:

Bee Natural Honey is recognised as probably the best honey in the East African region - We have a dominant market share of 70% in Uganda and, within 2 months of entering the Kenyan market are now the 2nd fastest selling honey in Kenya.

Our natural honey comes in a variety of glass jars of 250gm, 500gm and 1kg and food grade plastic containers of 500gm and 250gm. We have also introduced a new product into the market - Chunk honey.

Beeswax:

We have Beeswax sheets for hive baits, Bees wax blocks for sale and Candles for special occasions

Propolis:

We offer Propolis Tincture and Propolis Ointment
